

At The Forefront of
Technology and Innovation

www.graphic.plc.uk

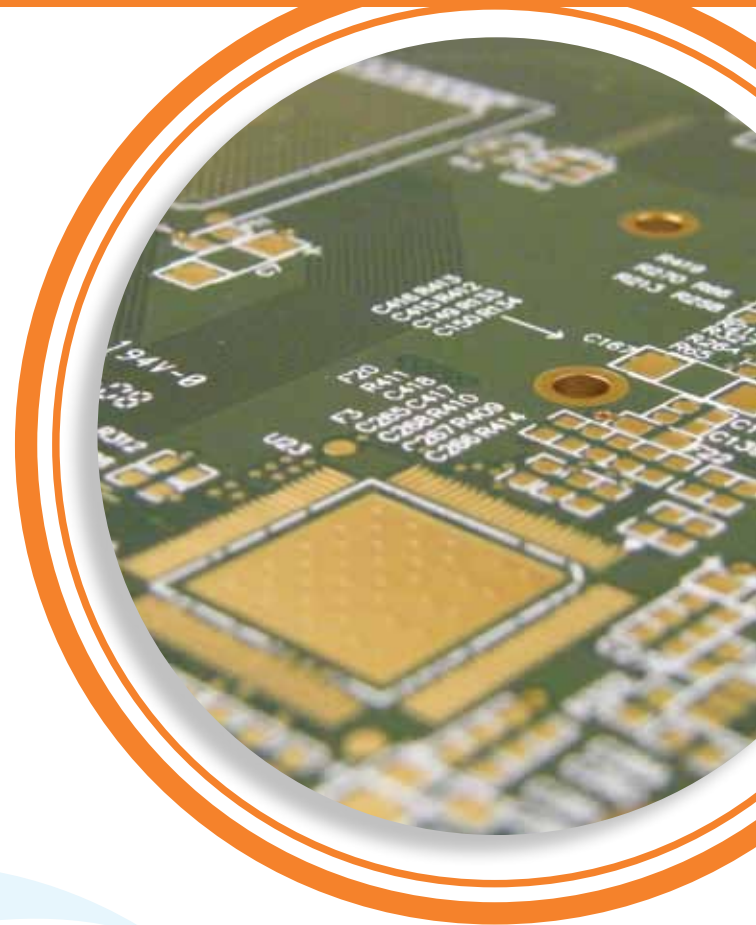

Graphic is one of the most technically competent manufacturers of high-technology printed circuit boards. Located in the heart of the English countryside, Graphic focuses on leading edge technology released to the most demanding international quality standards. Constantly looking at innovative solutions to customer requirements, Graphic is an expert at prototyping and developing new "first to market" products. With facilities in the UK and in China for medium to large volume production, Graphic are able to offer the complete service in PCB manufacture.

At The Forefront of Technology and Innovation

- Over 40 Years Manufacturing Experience In PCB's
- All Major International Approvals
- From Prototype To Volume
- Graphic Express Delivery
- Purpose Built Dual Site Location (UK And China)
- Over 500 Highly Skilled Employees
- Environmentally Friendly Sites
- HDI In Rigid And Flex Rigid
- Application Engineering / Design Support On Site
- World Class Customer Service
- Business / Manufacturing Excellence
- Technology Innovation

Graphic Worldwide

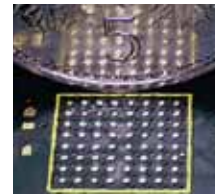

Graphic Offshore (DSG) based in Dongguan, South China is a purpose built 66,000 sq metre facility (completed early 2007) and is one of the most high technology facilities in China. Designed to manufacture technically demanding PCBs in medium to high volume and currently employing over 350 staff. DSG is on phase two of a three step development programme.

Graphic prides itself in being able to provide a complete service to our customers and cater for all of their PCB needs:

- Application Engineering onsite
- Prototyping manufacturing (Quick Turn available)
- Small-Medium volume production (Graphic UK site)
- Medium-Large volume production (Graphic China site)

Technology – Products

- Rigid And Flex-Rigid Technology
- Sequential Micro Via
- Copper And Resin Filled Vias
- Sequential Stacked Vias
- CTE Restricted Structures Using C-I-C / Carbon Core
- Multi Resin System Structures
- High-Speed Materials
- Thermal Management
- Buried Resistance / Capacitance
- Embedded Technologies
- 3 Dimensional Structures
- Sub 300 μm Flex-Rigid Multilayer
- AMC – Advanced Mezzanine Cards

Approvals

Graphic has always prided itself on having all the key approvals and certifications that its customer base would need, including MIL approvals for both FR4 and Polyimide, as well as Flex-rigid. More recently Graphic has gained BS EN 9100: 2003 (AS 9100 Rev B) and NADCAP. Graphic also takes pride in our environmental and health & safety approvals, and Graphic was the first company to obtain BSi approval for IPC-6012/6013 conformance.

System:

- BS EN 9100: 2003 (AS 9100 Rev C)
- NADCAP
- ISO 9001 : 2008
- ISO 14001
- OHSAS 18001

Product:

- DSCC
- MIL-PRF-31032
- MIL-PRF-55110 (Types 1-3)GF
- MIL-PRF-55110 (Types 1-3)GI
- MIL-P-50884 (Types 1-5)

Underwriters Laboratories

- UL796

IECQ - CECC

- BSEN 123100 / 200 / 300 / 400 / 500 / 600

Members:

- Intellect
- IPC
- ECCA
- EIPC
- CBI
- The Air League
- Associate Parliamentary Aerospace Group
- WEAFF

Technology – Markets

Graphic is involved in all markets that require the use of Printed Circuit Boards. Graphic manufactures products that have been designed in full by the customer, or by Graphic and the customer jointly, and Graphic is fully approved to make circuits to the highest standard.

Graphic's versatility ensures that whether making product for top military applications, top of the range outside broadcast units, satellite technology or indeed intricate medical devices, Graphic is always one step ahead of the competition with quality and innovation.

- Military Aerospace
- Commercial
- Security
- Industrial
- Space
- Broadcasting
- Medical
- Automotive

GRAPHIC

Graphic UK is located in CREDITON, Devon in South West England.
CREDITON is located about 7 miles (11 km) north west of Exeter.
